

Intermediate First Aid and CPR Training

Intermediate level training for First Aider team members consisting of different backgrounds and job environments was conducted on 28-29 March 2018, for 2 days and the program was facilitated by coaches, who are accredited and registered paramedic members.

This group has previously been exposed to basic training in order to build a solid foundation before being able to act as a part of emergency aid, whether inside the company premises or outside. With continuous exposure and training, the team members are able to extend their leadership and skills to the community in emergency situations requiring assistance.
